

# Flowers and Bulrushes

## Unit Five

## A. SCRIPTURE TALK

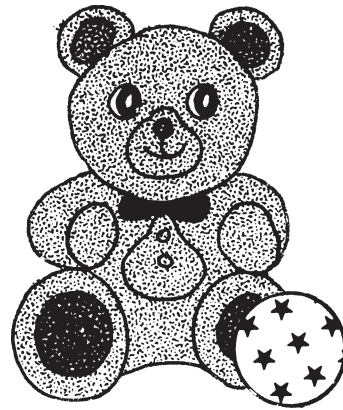

“... by love serve one another.”

Galatians 5:13

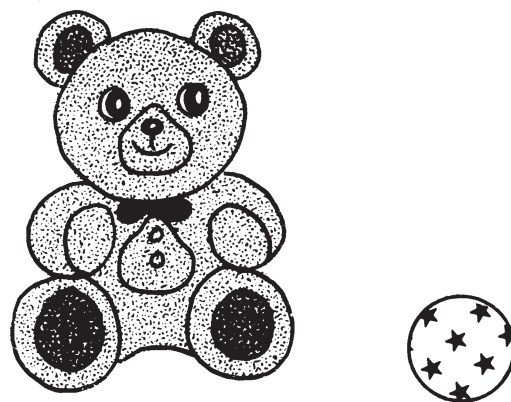

## B. OVERLAPPING

1. When one thing is drawn partly over another thing, we say that one **overlaps** the other. In the picture below, the ball overlaps the bear. Which do you think is in front, the ball or the bear? It's easy to see that the ball is in front, isn't it? **When one thing overlaps another, it's easy to tell which is closer.**

2. If we draw the ball to one side of the bear, it's hard to tell that the ball is closer. That's because **there is no overlapping.**

Overlapping helps to show distance. **We can easily tell which things are closer and which things are farther away when there is overlap.**

## C. OVERLAPPING IN A PAINTING

Overlapping is used to show distance in this painting. Who is closer, the man or the lady? Who is farther away?

Sargent, "Paul Helleu," 1889

### D. OVERLAPPING SHAPES

1. Draw two circles or triangles side by side in the space to the right. Make the shapes the **same size**. **Do not let the shapes touch each other.**

**Does one look closer, or do they both look the same distance away?**

2. Draw the same two shapes again. This time **make one of the shapes overlap the other.**

**Does one look closer now? Draw an “x” on the one that looks closer.**
