

B. TEXTURE

What is texture? We can think of **texture** as **the way something feels when we touch it**.

Today when we make fish and birds out of dough, we are going to put a **bumpy** texture pattern on them. We will do that by cutting out feathers or scales from the dough and gluing them to the fish and birds. The feathers and scales will make the fish and birds more interesting to look at.

**SOFT FUZZY SMOOTH ROUGH
PRICKLY FLUFFY PRICKLY FLUFFY**

C. ADDING FEATHERS AND SCALES

When we made our animal box sculptures, we cut feathers and scales with scissors.

Today we will cut them with a **knife**. When we add them to our dough fish or bird, we will use water to stick them on. And we must overlap them like they are in this picture.

When you begin to stick the feathers on your bird or the scales on your fish, where will you begin, at the head or at the tail?
